(2)3", (2)4.5", (2)7.5", 9"

STARTER KIT: CNX-BKS-20

Image examples are rendered versions of the actual system. Final product may vary slightly.

AN EVOLUTION OF THE CONNEX MODULE

An EQUIPTO Connex Module is designed to organize your storage container, however, that does not limit your use.

When you are finished using the Connex Module in a storage container, you can easily relocate the Module for additional storage into Bench Stock, Parts Room or a Tool Room. Once you have decided where to install the Module, EQUIPTO offers endless opportunities to expand your storage horizons. Looking for additional storage capacity in the same area, your Connex Module can evolve into a Deck-over Mezzanine Structure or a High Density Mobile Aisle Storage System.

CONNEX MODULE STORAGE SOLUTIONS
