We put space to work.

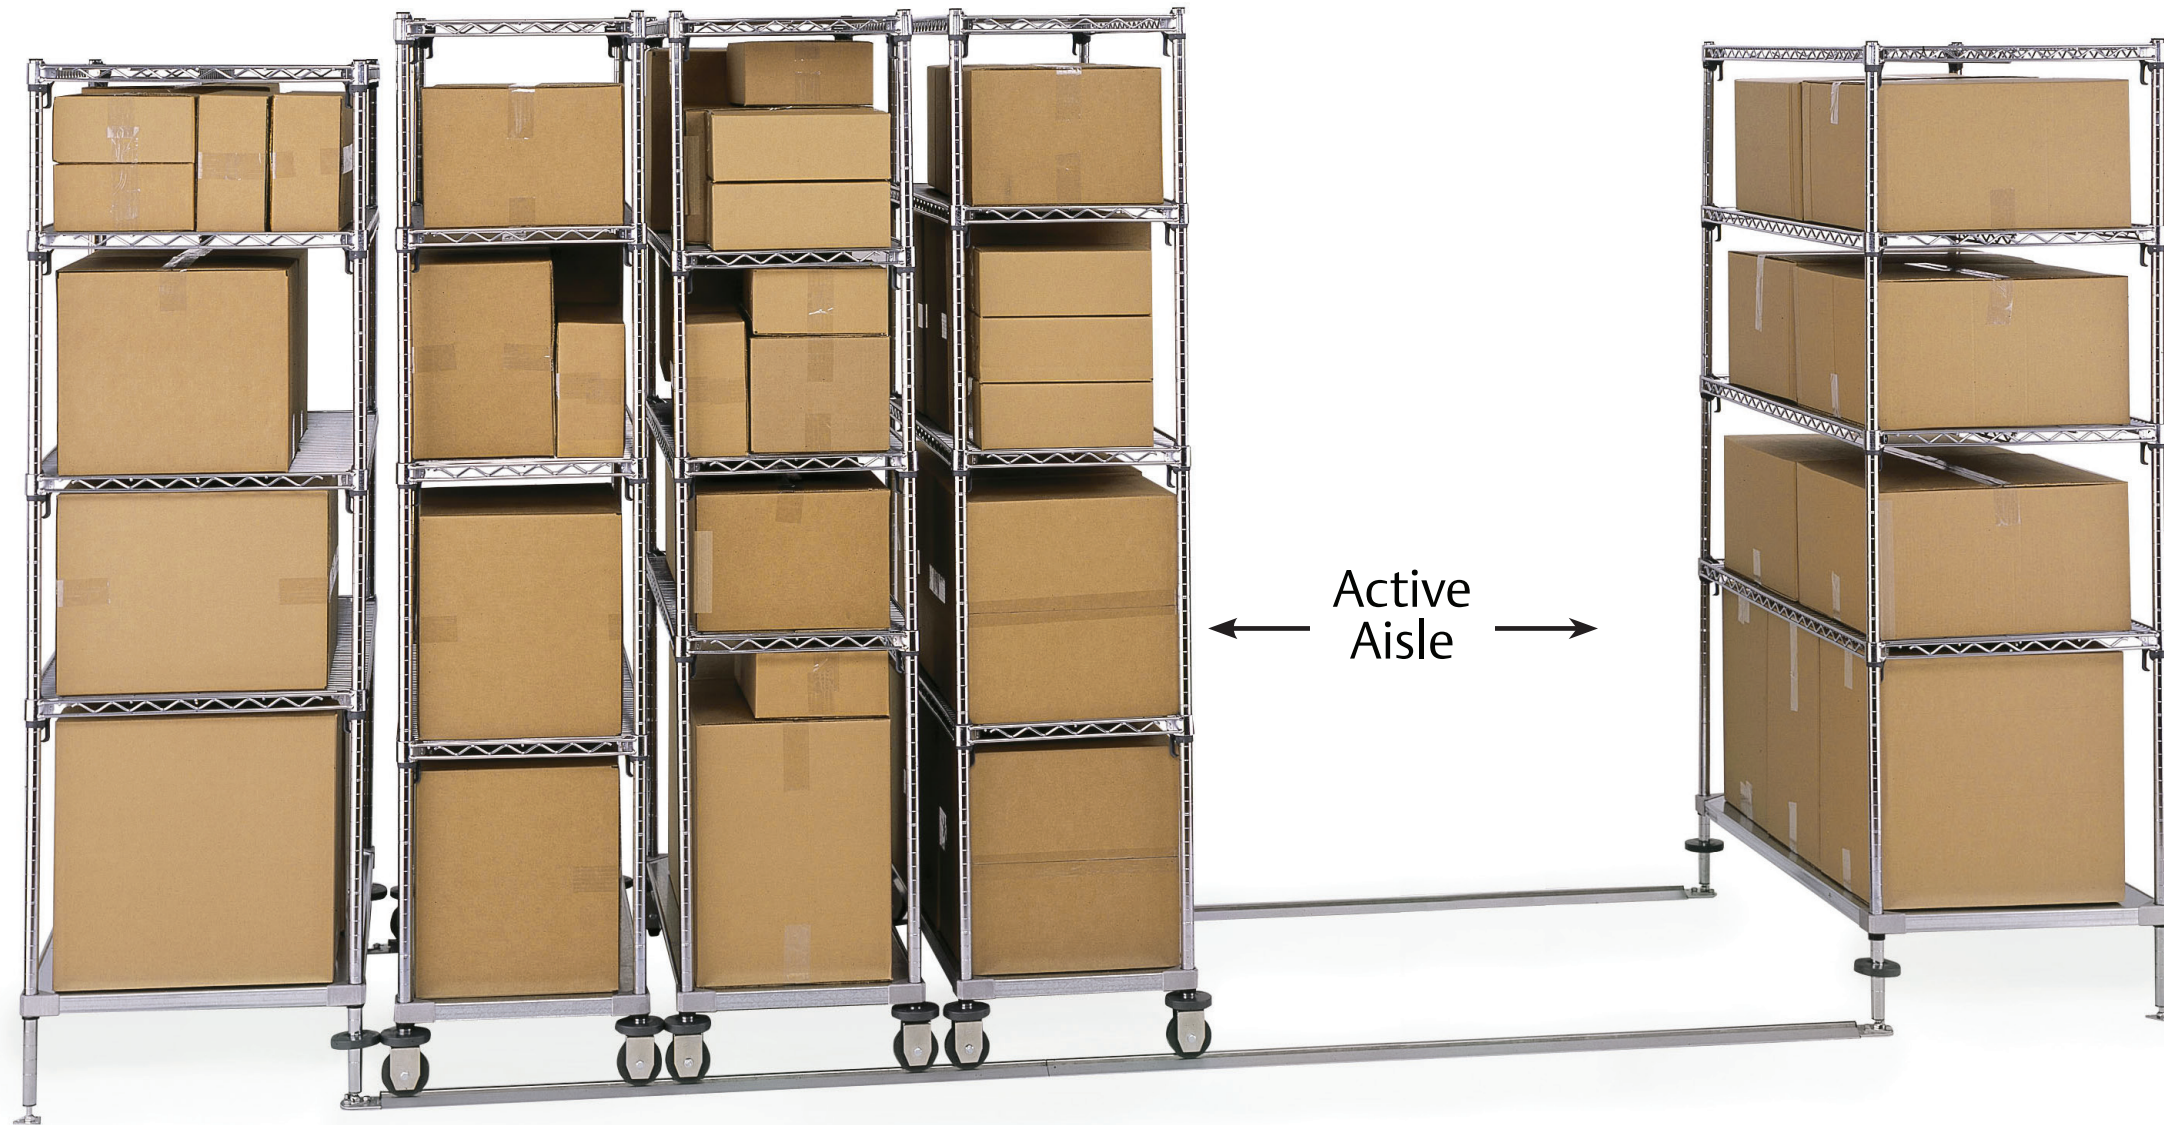

an Ali Group Company

The Spirit of Excellence

BOOST STORAGE SPACE BY UP TO **50%** WITH NO ADDED CONSTRUCTION COSTS.

Just slide the system to create an aisle wherever you need it. You'll be surprised at how large your existing storage area is. This Super Adjustable™ Super Erecta® qwikTRAK™ system has 5 shelving units just like above, note 3 of the units are on casters that roll on a guiding track which creates an "active aisle." This allows the units to be rolled up against each other, saving space and allowing more storage in a smaller footprint.

D E N S E

DURABLE & STRONG

Designed to withstand daily abuse. Shelving systems are designed to hold as much as 2000 lb. (907kg).

EFFICIENT

Metro High Density Systems can increase storage capacity by up to 50%!

NEAT & ORGANIZED

Accessories exist for all Metro shelving systems to easily identify, locate, and organize shelf contents.

SIMPLE TO ORDER & ASSEMBLE

Select one end kit per installation, one mobile kit per mobile unit, and just add shelves! Guiding tracks easily install between end units.

ERGONOMIC & ACCESSIBLE

Mobile units roll easily between fixed end units along a guiding track to create what is called the "Active Aisle".

qwikTRAK®

APPLICATIONS involving rough or choppy floor surfaces are best addressed by qwikTRAK. Heavily loaded qwikTRAK mobile units typically glide more easily than Top-Track units.

EASIEST TO ASSEMBLE shelving units go together in minutes. The guiding floor track is easily positioned between two end units, which anchor the system and the guiding track to the floor.

EASY TO MOVE HEAVY LOADS MetroMax i™ mobile qwikTRAK units can hold up to 1200 lb. (544kg). MetroMax Q, Super Adjustable, and Super Erecta mobile qwikTRAK units can hold up to 2000 lb. (907kg). Mobile units are easy to move, even with heavy weight loads.

DOUBLE DEEP CONFIGURATIONS can be created where two systems are joined together to increase the overall depth of the storage system for even greater storage capacity. Double Deep qwikTRAK is suitable for use with Super Erecta, Super Adjustable, MetroMax Q®, and MetroMax i® systems.

qwikTRAK® High Density Storage (The track is on the floor)

FLOOR TRACKS "V" Groove Casters on mobile units glide easily along a low profile, aluminum track. The sloped sides of the track allow easy access to the Active Aisle

Top-Track®

APPLICATIONS involving uneven floor surfaces or intense cleaning of the floor area around the storage system are best addressed by Top-Track.

EASY TO ASSEMBLE shelving units go together in minutes. Tracks attach to support rails on each end unit above the mobile units.

WEIGHT CAPACITIES on mobile units are limited to 900 lb. (410kg).

DOUBLE DEEP CONFIGURATIONS can be created where two systems are joined together to increase the overall depth of the storage system for even greater storage capacity. Double Deep Top-Track is only available for Super Erecta style shelving.

Top-Track® High Density Storage (The track is overhead)

ROLLER BEARINGS on the top of the posts guide mobile units in a straight line along the track.
