Shelving Carousel

The Vidir Shelving Carousel is a semi/fully automated vertical carousel that features free hanging carriers that rotate up and down to deliver SKU's to the operator at an ergonomic height. The Carousel features a unique design providing an introductory vertical carousel for small parts with the ability to upgrade into a heavy duty, fully customized, storage solution for unique applications. The robust and reliable design makes the unit an ideal solution for manufacturing lines and other mission critical environments.

- Semi or Fully automated systems available.
- 13,000 lbs and 34,000 lbs overall capacities available.
- Utilizes overhead space for maximum storage density.
- Ergonomic design increases workplace safety and reduces back injuries
- Improved productivity with more efficient SKU picking.
- Built-to-fit specifications

Safe Handling • Easy Access • Maximum Storage • Fast Retrieval • Small Footprint

Carrier Configuration

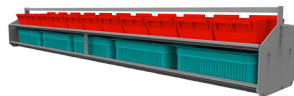

The Shelving Carousel features a robust and reliable design that requires minimal maintenance and accepts extensive customizations to save space, improve workplace safety, and increase accessibility in both unique and mission critical environments. The carriers depth, height, and width can be altered and designed to accept custom fittings and molds.

Std. Carrier

A standard open carrier for the shelving carousel is 18.5" H x 20" D

and provides flexibility whether storing SKU's directly on the carrier, using standard containers, or application specific containers to best utilize the available space.

Std. Configurations

Intermediary shelves and dividers are available to partition the carrier

to create internal storage compartments for better organization.

Custom Carriers

Carriers can be custom designed to accept unique profiles and handling

procedures to accomodate heavier and bulkier items that do not conform to conventional storage systems.
